

**Note**

TRI+ represents the interface between the TRI dental implant system and the Simplant software by Materialise. The following instructions are intended only for users who are familiar with the Simplant planning software.

## Indications

- 3D implant planning
- Guided pilot drilling without depth stop
- Guided pilot drilling with depth stop

## Process Description

Implementation of TRI implants and TRI sleeves into Simplant is pending. Generic implant planning and sleeve systems can be used for the moment.

## Required Articles from TRI Implants

TPD-2.3L	Pilot Drill – Long – 2.3 mm; Nr. 5
TPDS	TRI pilot drill sleeve

## Downloads

Planned release of the TRI implants in Simplant is Q4/2013. Please come back again to check the current status or contact your local TRI representative for more information.
