

### Note

TRI+ represents the interface between the TRI dental implant system and the SICAT planning software. The following instructions are intended only for users who are familiar with the SICAT system.

## Indications

- 3D implant planning
- Guided pilot drilling without depth stop
- Guided pilot drilling with depth stop

## **TRI+ SICAT**

TRI implants and sleeves will be implemented in the next release of the SICAT planning software in November 2013. Please come back and check for updates or contact your local TRI representative.
